

The Johannesburg Centre of the Astronomical Society presents

How to get the best from Astronomical Image Processing

by **Richard Berry**

When: 20 April 2007 at 2pm – 5pm

Where: National Museum of Military History (22 Erlswold Way, Saxonwold, Johannesburg – next to the Zoo)

Cost: R50

How to Register: mail lerika@icon.co.za

More info? Go to www.assajhb.co.za and click on ScopeX 2007

Who should attend?

This is the first time a session of this nature will be presented in South Africa – consider attending if you:

- have already experimented with astrophotography
- are an observer doing photometry, astrometry
- are teaching or learning astronomy
- are already using or intend using the software product AIP4Win

Richard Berry will be the special overseas guest at ScopeX 2007. Richard is co-author with James Burnell of *The handbook of Astronomical Image Processing* and *AIP4WIN*

What has been said about the book and software:

- “finest book to date covering the entire gamut of digital astrophotography. It should be mandatory reading for those shooting digital pictures planets, or deep-sky objects” *Dennis Di Ciccio – Senior Editor Sky & Telescope May 2006*
- “Is one of the best bargains you will ever find in astronomy” *Robert Reeves author of Introduction to Digital Astrophotography*

SAASTA is the non-commercial sponsor of ScopeX 2007
